DR. King's Restoration Method

What It Does for Toothless People

D. D. S.

Originator of Dr. King's Restor-ation Method for the natural restoration of teeth—originator of the King Safe System of Painless Dentistry and Inventor of the "Natural Gum" Set of Teeth, Etc., Etc., All rights re-

we are able to give back to a patient the full set of teeth he or she started in with in the beginning. All we require is two or more teeth in each faw to work from and we shall not resort to plates er ereinary bridgework in the process of the work. Your mouth will be free from inoumbrances.

By means of this wonderful method

Before we accomplish this result we put the gums and the natural teeth in a healthy condition, tightening the teeth which may be loose and ouring pyorrhes if the pastent is afflicted with that dreadful dis-

All of the teeth we supply age practical teeth; each set in its own socket following natures plan, so that the strain is equally dished. One is able to bite on these teeth and use them in exactly the same manner as he would his natural teeth. They match natures teeth so clessly as to deceive expens. They are beautiful to look at and a sounce of constant delight to the one why were them.

A PAINLESS PROCESS

An impression has gone forth that there is some surgical eparath connected with this method of restoring missing teeth. Some page have written in to know if we bore down into the bone and put the teeth in on pegs !

Others have an idea we set the new teeth into the secheta natural tooth were originally,

It is quite natural that some unthinking people would ask such questions, and in order that they may be fully answered we will state the there is no boring, no outling, no implantation about this method, met ing about the work that is painful while it is being done or aftenward Patients leave the office with these teeth in place and at once begin chewing ment, eating candy, toast, or anything else with the same ownfort they would enjoy if every tooth in their head had grown there. If we couldn't promise this and make good on the promise, the Re-

ordinary bridgework or partial plates. WE ARE GENERAL PRACTITIONERS

storation Method would not be a success. It would be no better then

All Forms of Dontistry Treated by Experts. While the Restoration Method is our great specialty we are general dental practitioners as well. From the simplest filling to the most intricate piece of porcelain work, our experts are at the service of the

Naturally we would do such work well, much better than it costs be done in a one-man office, for the operators employed here are all men of the very highest skill. They need to be to do the Resteration week. Bunglers would not be tolerated in our office for a day neither would dental students. We demand the finished craftsman, both at the operating chair and in the laboratory.
